

**SYSTEM AND METHOD FOR PROVIDING AUDIBLE OUTPUTS  
IN A PRE-BOOT ENVIRONMENT IN A COMPUTER SYSTEM**Abstract of Disclosure

5

A system that includes a speech synthesizer and a computer system that includes a basic input output system (BIOS). The BIOS is configured to cause the computer system to display information and, in response to detecting the speech synthesizer, cause the computer system to provide one or more signals associated with the information to the speech synthesizer. The speech synthesizer is configured to generate one or more audible outputs associated with the information in response to receiving the one or more signals.
